Safe Harbor Statement

The following information contains, or may be deemed to contain, “forward-looking statements” (as defined in the U.S. Private Securities Litigation Reform Act of 1995). The words “believe,” “expect,” “anticipate,” “intend,” “estimate” and other expressions that are predictions of or indicate future events and trends and that do not relate to historical matters identify forward-looking statements. You should not place undue reliance on these forward-looking statements. Although forward-looking statements reflect management’s good faith beliefs, reliance should not be placed on forward-looking statements because they involve known and unknown risks, uncertainties and other factors, which may cause the actual results, performance or achievements to differ materially from anticipated future results, performance or achievements expressed or implied by such forward-looking statements. Forward-looking statements speak only as of the date the statements are made. We undertake no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events, changed circumstances or otherwise. These forward-looking statements are subject to numerous risks and uncertainties, including, but not limited to: our participation in markets that are competitive; the highly cyclical industries in which certain of our end users operate; the failure of markets outside North America to increase adoption of fully-automatic transmissions; risks related to our substantial indebtedness; uncertainty in the global regulatory and business environments in which we operate; the concentration of our net sales in our top five customers and the loss of any one of these; future reductions or changes in government subsidies and other external factors impacting demand for hybrid vehicles; U.S. defense spending; general economic and industry conditions; the discovery of defects in our products, resulting in delays in new model launches, recall campaigns and/or increased warranty costs and reduction in future sales or damage to our brand and reputation; our ability to prepare for, respond to and successfully achieve our objectives relating to technological and market developments, competitive threats and changing customer needs; risks associated with our international operations; labor strikes, work stoppages or similar labor disputes, which could significantly disrupt our operations or those of our principal customers; and our intention to pay dividends and repurchase shares of our common stock.

Allison Transmission cannot assure you that the assumptions made in preparing any of the forward-looking statements will prove accurate or that any long-term financial goals will be realized. All forward-looking statements included in this presentation speak only as of the date made, and Allison Transmission undertakes no obligation to update or revise publicly any such forward-looking statements, whether as a result of new information, future events, or otherwise. In particular, Allison Transmission cautions you not to place undue weight on certain forward-looking statements pertaining to potential growth opportunities, long-term financial goals or the value we currently ascribe to certain tax attributes set forth herein. Actual results may vary significantly from these statements.

Allison Transmission’s business is subject to numerous risks and uncertainties, which may cause future results of operations to vary significantly from those presented herein. Important factors that could cause actual results to differ materially are discussed in Allison Transmission’s Annual Report on Form 10-K for the year ended December 31, 2016.

Multiple Organic Growth Opportunities

Developed Markets Opportunities

Increase Penetration of Fully-Automatic Transmissions

Accelerate Adoption in Emerging Markets

Global Off-Highway Growth Opportunities

Continue New Technology and Product Development

Developed Markets Opportunities

- Growth opportunity driven by maturing cyclical recovery in core North America market
- Production has rebounded from cyclical lows with moderate growth fueled by pick-up in economic activity
 - Housing recovery and increased construction activity drives greater demand for medium and heavy duty trucks
 - Lack of near term significant EPA emission changes reduces cyclicality
- Allison's growth is also supported by
 - Pent up demand from deferred purchases
 - Continued demand for fuel efficient vehicles
- Significant opportunity in Class 8 Metro market with new TC10 transmission
 - Only 6% share of a large addressable market

North America Production in Allison's Core Addressable Market (units in 000s)⁽¹⁾

Increase Penetration of Fully-Automatic Transmissions

- Ongoing need for productivity improvements
 - Better acceleration and shorter travel time result in increased miles and revenue
 - Improved fuel efficiency and increased vehicle uptime
- Focus on reducing life cycle costs
 - Lower maintenance and fuel expense
 - Increased vehicle residual value
- Micro and demographic trends
 - Ease of operation increases pool of qualified drivers
 - Less driver training, lower turnover and improved safety
- Underserved North America market segments

Accelerating Adoption in Emerging Markets – China

- Allison is the #1 supplier of fully-automatic transmissions in China as a result of targeting specific vocations
 - Substantial installed base of over 65,000 transmissions in China
- Several million commercial vehicles produced annually of which approximately 200 thousand are addressable by Allison
 - Allison's existing bus presence serves as entry point for incremental penetration into a market in which Fully-Automatic penetration is less than 5%
- Significant growth opportunities by targeting a wide range of vocational truck applications
 - Government emphasis on equipment modernization for mining, rescue operations, school buses and other applications
 - Construction and oil field sector
- OEM release activities supported by focused end user initiatives resulting in fleets requesting Allison by name

Allison's China Truck Vocational Focus

Global Off-Highway Growth Opportunities

● Energy Sectors

- Considerable end market cyclical, currently at trough levels
- Multiple opportunities in exploration, fracturing and oil and gas support
- Introduction of new high horsepower hydraulic fracturing transmissions

● Mining and Construction

- Considerable end market cyclical, currently at trough levels
- NA, Europe, Middle East, Africa and China
- Increasing urbanization in emerging markets

Investment in Technology and Product Development

Fuel Economy – FuelSense®

- New On-Highway Product Features
 - Automatically adapts shift schedules and torque, maximizing transmission efficiency
 - 5th Generation Electronic Controls improve fuel economy, acceleration management, precision inclinometer, advanced diagnostic and prognostic displays
- FuelSense is available in three unique packages: FuelSense, FuelSense Plus™ and FuelSense Max™
- FuelSense 2.0 launch in 2017

Fuel Economy – xFE Models

- New transmissions with optimized gear ratios coupled with FuelSense Max™ packages
- Represents the latest in fuel savings innovation
 - Significantly more torque converter lock-up operation, spending more time in higher ranges at lower engine speeds
 - Producing fuel savings of up to 7% over comparatively equipped models with FuelSense features

High Horsepower Hydraulic Fracturing Transmissions

- New 9826 and 9832 Oil Field Series (OFS) models based on six decades of industry expertise
- Addresses global market demand for higher horsepower, extended duty cycles, lower days-to-depth and higher recovery factors
- Also announced enhancements to existing 9800 OFS models

Class 8 Metro

- Ten-speed fully-automatic transmission targeted at Class 8 tractors primarily serving urban markets
 - Addressable annual market size of ~60k units
 - Historically a “manual” market underserved by Allison’s fully-automatic product portfolio
- PACCAR announcement of the availability of the TC10 in Kenworth and Peterbilt models with both PACCAR and Cummins engines

Average Annual Spend over \$110 Million in Product-Related Research and Development Since Acquisition in August 2007

Appendix: Non-GAAP Financial Information

Non-GAAP Financial Information

We use Adjusted EBITDA and Adjusted EBITDA margin to measure our operating profitability. We believe that Adjusted EBITDA and Adjusted EBITDA margin provide management, investors and creditors with useful measures of the operational results of our business and increase the period-to-period comparability of our operating profitability and comparability with other companies. Adjusted EBITDA margin is also used in the calculation of management's incentive compensation program. The most directly comparable U.S. generally accepted accounting principles ("GAAP") measure to Adjusted EBITDA is Net income. Adjusted EBITDA is calculated as the earnings before interest expense, income tax expense, amortization of intangible assets, depreciation of property, plant and equipment and other adjustments as defined by our debt agreement. Adjusted EBITDA margin is calculated as Adjusted EBITDA divided by net sales.

We use Adjusted free cash flow to evaluate the amount of cash generated by our business that, after the capital investment needed to maintain and grow our business and certain mandatory debt service requirements, can be used for repayment of debt, stockholder distributions and strategic opportunities, including investing in our business and strengthening our balance sheet. We believe that Adjusted free cash flow enhances the understanding of the cash flows of our business for management, investors and creditors. Adjusted free cash flow is also used in the calculation of management's incentive compensation program. The most directly comparable GAAP measure to Adjusted free cash flow is Net cash provided by operating activities.
