

Indonesia's Medium Tank Program Features Allison Transmission

May 18, 2021

Allison's cross-drive transmission powers Indonesia's Harimau (Black Tiger) Medium Tank.

INDIANAPOLIS--(BUSINESS WIRE)--May 18, 2021-- Allison Transmission, the largest global manufacturer of medium- and heavy-duty fully automatic transmissions for commercial and military vehicles, is an active participant in defense programs around the world. Most recently, Allison Transmission has proudly collaborated with Caterpillar Defense, FNSS and PT Pindad, to provide a new medium tank to the Indonesian Armed Forces, known as the Harimau. Nail Kurt, FNSS General Manager and CEO, reports planned production of between 200 and 400 of these tanks that are uniquely suited for the dense vegetation prevalent in Asia. (<https://www.aa.com.tr/en/asia-pacific/turkish-indonesian-tank-ready-for-mass-production/1247122>)

The Harimau is a new medium weight tank designed to increase the capability of the Armed Forces mechanized forces, providing Indonesia with the mobility and firepower capability needed in some of the most difficult terrain. The Harimau program is one of the Indonesia's highest priority signature modernization initiatives and has passed extensive testing by both FNSS/PT Pindad and the Indonesian Armed Forces and now enters full production. The Harimau tank relies on Allison's proven cross-drive transmission technology, designed for medium-tracked combat vehicles, and provides propulsion, steering and braking. The automatic transmission, manufactured under license by Caterpillar Defense in Shrewsbury, UK, has powered combat vehicles worldwide for decades.

"We appreciate the opportunity to provide the propulsion systems for this critically important and impressive vehicle for the Indonesian Armed Forces," said Dana Pittard, Vice President for Defense Programs at Allison Transmission. "As we continue to support Indonesia with our world-class fully automatic transmissions, Allison is also collaborating with customers around the world to meet their current and future transmission requirements for medium weight armored vehicles. Allison Transmission is incredibly proud to collaborate with Caterpillar Defense, FNSS and PT Pindad to deliver quality products at tremendous value."

Allison works with OEMs around the world to design, develop, manufacture and support transmissions that deliver in the most extreme conditions. For fleets that are developing new wheeled or tracked vehicles, Allison can tailor a transmission specifically for that application. Allison engineers and manufactures reliable and fully customizable propulsion solutions, so customers experience reduced downtime and increased ability to accomplish critical objectives.

About Allison Transmission

Allison Transmission (NYSE: ALSN) is a leading designer and manufacturer of vehicle propulsion solutions for commercial and defense vehicles, the largest global manufacturer of medium- and heavy-duty fully automatic transmissions, and a leader in electrified propulsion systems that *Improve the Way the World Works*. Allison products are used in a wide variety of applications, including on-highway trucks (distribution, refuse, construction, fire and emergency), buses (school, transit and coach), motorhomes, off-highway vehicles and equipment (energy, mining and construction applications) and defense vehicles (tactical wheeled and tracked). Founded in 1915, the company is headquartered in Indianapolis, Indiana, USA. With a presence in more than 150 countries, Allison has regional headquarters in the Netherlands, China and Brazil, manufacturing facilities in the USA, Hungary and India, as well as global engineering resources, including electrification engineering centers in Indianapolis, Indiana, Auburn Hills, Michigan and London in the United Kingdom. Allison also has more than 1,400 independent distributor and dealer locations worldwide. For more information, visit allisontransmission.com.
