Investor Relations Presentation Third Quarter 2018 (Published November 5, 2018)

Safe Harbor Statement

The following information contains, or may be deemed to contain, "forward-looking statements" (as defined in the U.S. Private Securities Litigation Reform Act of 1995). The words "believe," "expect," "anticipate," "intend," "estimate" and other expressions that are predictions of or indicate future events and trends and that do not relate to historical matters identify forward-looking statements. You should not place undue reliance on these forward-looking statements. Although forward-looking statements reflect management's good faith beliefs, reliance should not be placed on forward-looking statements because they involve known and unknown risks, uncertainties and other factors, which may cause actual results, performance or achievements to differ materially from anticipated future results, performance or achievements expressed or implied by such forward-looking statements. Forward-looking statements speak only as of the date the statements are made. We undertake no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events, changed circumstances or otherwise. These forward-looking statements are subject to numerous risks and uncertainties, including, but not limited to: risks related to our substantial indebtedness; our participation in markets that are competitive; the highly cyclical industries in which certain of our end users operate; uncertainty in the global regulatory and business environments in which we operate; the failure of markets outside North America to increase adoption of fully-automatic transmissions; the concentration of our net sales in our top five customers and the loss of any one of these; our ability to prepare for, respond to and successfully achieve our objectives relating to technological and market developments, competitive threats and changing customer needs; U.S. and foreign defense spending; general economic and industry conditions; increases in cost, disruption of supply or shortage of raw materials or components used in our products; the discovery of defects in our products, resulting in delays in new model launches, recall campaigns and/or increased warranty costs and reduction in future sales or damage to our brand and reputation; risks associated with our international operations, including increased trade protectionism; future reductions or changes in government subsidies for hybrid vehicles and other external factors impacting demand; labor strikes, work stoppages or similar labor disputes, which could significantly disrupt our operations or those of our principal customers; and our intention to pay dividends and repurchase shares of our common stock.

Allison Transmission cannot assure you that the assumptions made in preparing any of the forward-looking statements will prove accurate or that any long-term financial goals will be realized. All forward-looking statements included in this presentation speak only as of the date made, and Allison Transmission undertakes no obligation to update or revise publicly any such forward-looking statements, whether as a result of new information, future events, or otherwise. In particular, Allison Transmission cautions you not to place undue weight on certain forward-looking statements pertaining to potential growth opportunities, long-term financial goals or the value we currently ascribe to certain tax attributes set forth herein. Actual results may vary significantly from these statements.

Allison Transmission's business is subject to numerous risks and uncertainties, which may cause future results of operations to vary significantly from those presented herein. Important factors that could cause actual results to differ materially are discussed in Allison Transmission's Annual Report on Form 10-K for the year ended December 31, 2017.

Business Overview

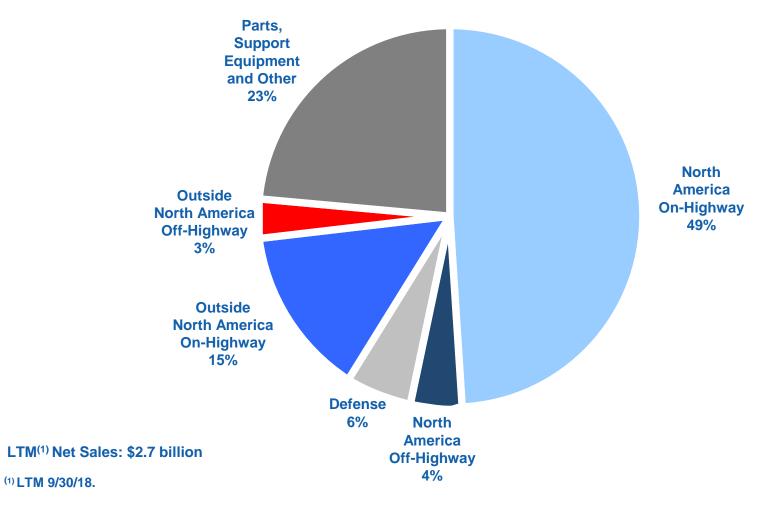

Allison Transmission at a Glance

- World's largest manufacturer of fully-automatic transmissions for medium- and heavy-duty commercial vehicles
 - 60% global market share of fully-automatic transmissions
 - Virtually no exposure to cyclical Class 8 line-haul tractor market
- Allison is the premier fully-automatic transmission brand
 - Premium price component frequently specified by end users
 - Differentiated technology offering superior performance and lower total cost of ownership
- Well positioned for revenue and earnings growth
 - Further adoption outside North America
 - Expanding addressable market
 - Funded growth opportunities in asset light business model
- Strong cash flow generation and well-defined capital allocation policy

Allison Transmission at a Glance

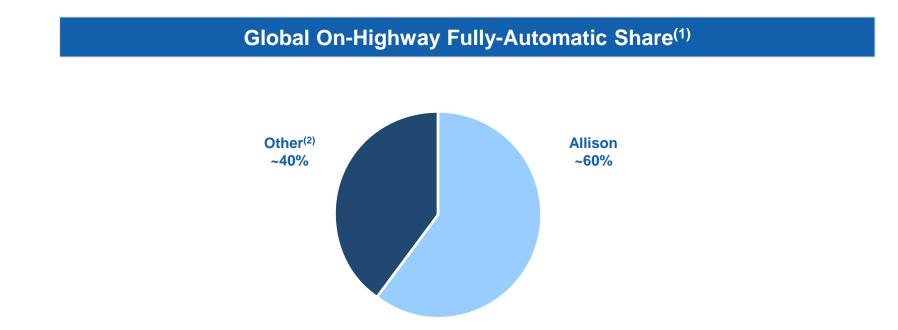

LTM⁽¹⁾ Net Sales by End Market

Global Market Leader

- The "de facto" standard in medium- and heavy-duty applications
 - Well established as standard in North America
- Increasing presence in emerging markets which today are predominantly manual
- Virtually no exposure to cyclical Class 8 line-haul tractor market

(1) 2017 Units. Source: Allison and ACT Research.

(2) Majority of "Other" volume is in North American Class 4-5 truck and European bus.

North America On-Highway End Market

		Underserved		Core Addres		Underserved	Class 8	
	Class 1-3	Class 4-5	Motor Home	School Bus	Class 6-7	Class 8 Straight	Class 8 Metro	Tractor (Linehaul)
Vehicles								
Weight (000s of lbs)	< 14 lbs	14 – 19 lbs	16 – 33 lbs	16 – 33 lbs	19 – 33 lbs	33 lbs+	33 lbs+	33 lbs+
2017 Industry Units Produced	11,288,285	100,003	21,802	37,600	96,463	79,006	55,447	121,137
2017 Allison Share	0%	4%	38%	88%	71%	68%	7%	0%

- ~ 30-40% of Allison's North America On-Highway market volume is driven by municipal spending, reducing end-market volatility
- Near-term opportunity to further penetrate Class 4-5, following General Motors / Navistar agreement to re-enter¹ the medium-duty market in late 2018, exclusively with the Allison fully-automatic transmission
- Enhanced value proposition for Class 8 Metro² market with proprietary FuelSense[®] 2.0 software, and fully-automatic 3000 Series[™], 4000 Series[™] and TC10[®] transmissions

Note: Analysis excludes Allison's Transit/Coach Bus and Electric Hybrid Transit Bus volume.

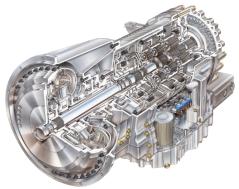

Source: Class 1-3 from WardsAuto North America Production – December 2017; Core Addressable Market and Class 8 Tractor from Allison and ACT Research.

^{1.} General Motors previously exited the medium-duty market in 2009.

^{2. &}quot;Metro" is a term for tractors that are used in urban environments, currently representing ~30% of the Class 8 tractor market.

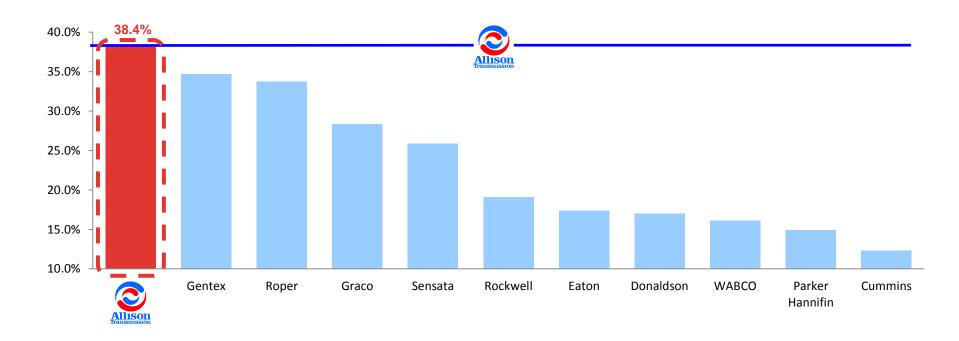

Strategic Priorities

- Expand global market leadership
 - Capitalize on improved developed markets demand
 - New vocational offerings
- Emerging markets penetration
 - Vocational ladder strategy
 - Increase number of vehicle releases
- Continued focus on new technologies and product development
 - Address markets adjacent to core
 - Leverage core technologies for new products with minimal investment
 - Advanced fuel efficient and emissions reduction technologies
 - Alternative fuels and electrification initiatives
- Deliver strong financial results
 - Exploit capacity availability and asset light business model
 - Focus on margin sustainment
 - Earnings growth and cash flow generation
 - Well-defined capital allocation policy

EBITDA Margin¹

1. Fiscal year 2017 peer EBITDA provided by FactSet. EBITDA included above may not be consistent with such entity's reported EBITDA or Adjusted EBITDA, if available. EBITDA Margin: EBITDA or Adjusted EBITDA divided by net sales.

See appendix for comments regarding the presentation of non-GAAP financial information.

Premier Industrial Company

A Recognized Leader and Respected Brand

- Over 100 year history of providing highquality innovative products and demonstrated value to end users
- The Allison brand is associated with:
 - High Quality
 - Reliability
 - Durability
 - Vocational Value and Expertise
 - Technological Leadership
 - Superior Customer Service
 - Attractive Total Lifecycle Value

UP TO 20% BETTER FUEL ECONOMY

The Savings Are Automatic

Discover fuel economy you never thought possible. Introducing FuelSense* from Allison Transmission. Your fleet and drivers can get up to 20% better fuel economy. All with the ease and dependability you expect from an Allison fully automatic transmission.

Specify FuelSense. This package delivers.

End Users Frequently Request Allison Transmissions by Name and Pay a Premium for Them

End User Value Proposition

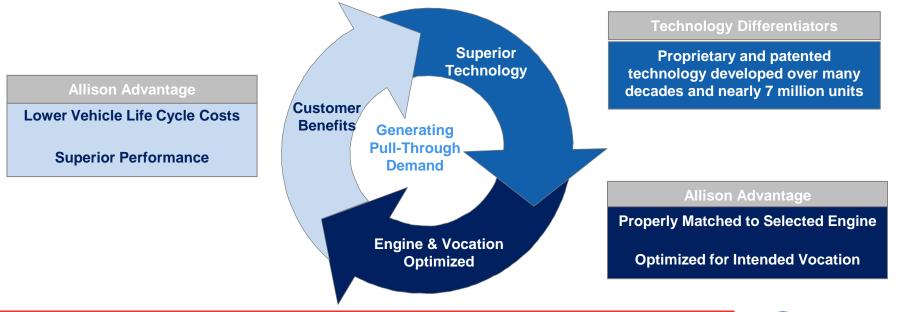

Payback period for a premium Allison Transmission averages less than 3 years

Technology Leadership – The Allison Advantage

- Allison employs proprietary and patented technology developed over many decades and nearly seven million units
- Technology is matched to the selected engine and optimized for the intended vocation
- Software algorithms are individually tailored to maximize performance in thousands of duty cycles
- Customers benefit from superior performance and lower life cycle costs

Very Diverse End Markets

Fransmission

Over 50 Year Relationship with Industry-Leading OEMs

Significant Cash Flow Generation

Adj. Free Cash Flow Generation⁽¹⁾

(\$ in millions)

Note: See appendix for comments regarding the presentation of non-GAAP financial information.

(1) See appendix for a reconciliation of Adjusted Free Cash Flow.

(2) LTM 9/30/18.

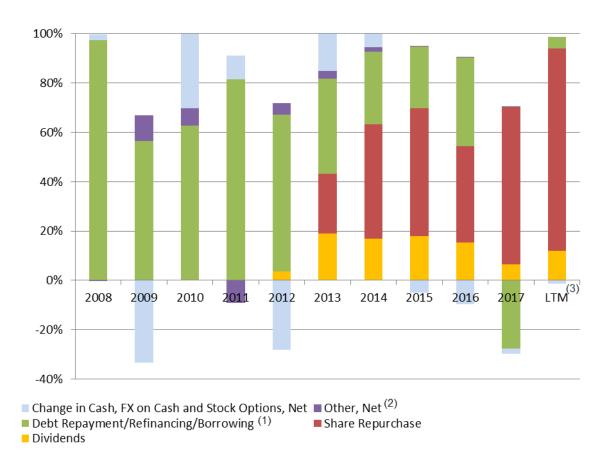

Capital Allocation Priorities

- Organic revenue and earnings growth
- New product and technology development
- Prudent balance sheet management
- Return capital to shareholders
- Low-cost, flexible and pre-payable debt structure with long dated maturities

Free Cash Flow Utilization

Note: See appendix for comments regarding the presentation of non-GAAP financial information.

- (1) Net of change in Cash & Cash Equivalents
- (2) 2009 adjusted for certain non-recurring activity: (a) capitalized accrued interest on Senior Toggle Notes (\$29) million, (b) cash restructuring charge \$51 million, (c) accounts payable early payments \$3 million, (d) delayed accounts receivable receipts \$19 million and (e) Lehman LIBOR swap settlement \$17 million. All periods adjusted for collateral for interest rate derivatives, purchase of available-for-sale securities, proceeds from disposal of assets, investments in technology-related initiatives and license expenses, and fee to terminate services agreement with Sponsors.
 (3) LTM 9/30/18.

Well-Defined Capital Allocation Policy

- Realize returns from completed investments in global commercial capabilities, and new product and technology development
- Prudent balance sheet management
- Return capital to shareholders
 - Quarterly dividend
 - \$2.0 billion share repurchase authorization
- Low-cost, flexible and pre-payable debt structure with long dated maturities

Multiple Organic Growth Opportunities

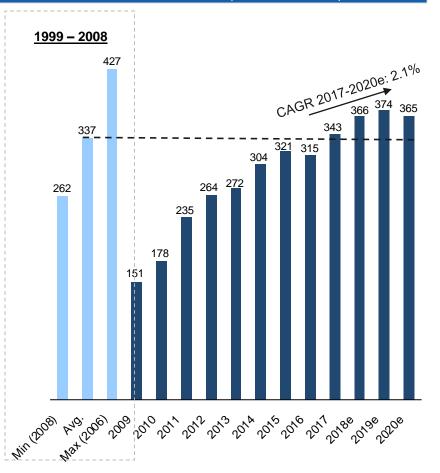

Developed Markets Opportunities Increase Penetration of Fully-Automatic Transmissions Accelerate Adoption in Emerging Markets Global Off-Highway Growth Opportunities Leading Technology and Innovation **Diverse Propulsion Solutions**

Developed Markets Opportunities

- Production has rebounded from cyclical lows with moderate growth fueled by pickup in economic activity
 - Housing recovery, increased construction and energy activities driving greater demand for medium and heavy duty trucks
 - Lack of near term significant EPA emission changes reduces cyclicality
- Allison's growth is also supported by
 - Pent up demand from deferred purchases
 - Continued demand for fuel efficient vehicles
- Near-term opportunity to further penetrate underserved markets
 - GM re-entering Class 4-6 market, exclusively with Allison transmission in late 2018

North America Production in Allison's Core Addressable Market (units in 000s)⁽¹⁾

(1) Source: ACT Research, October 2018. Includes: Class 4 thru 8 less Class 8 Tractor & Class 8 Straight with Sleeper. 2018e: Total 599,033 less Class 8 Tractor of 231,096 less Class 8 Straight with Sleeper of 2,078.

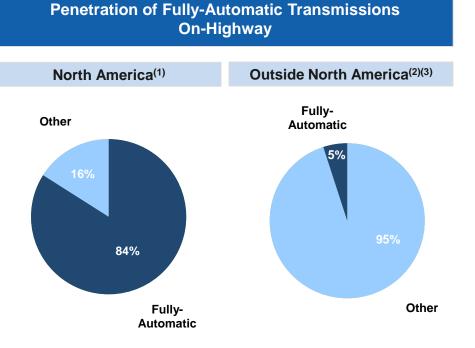

Increase Penetration of Fully-Automatic Transmissions

- Ongoing need for productivity improvements
 - Better acceleration and shorter travel time result in increased miles and revenue
 - Improved fuel efficiency and increased vehicle uptime
- Focus on reducing life cycle costs
 - Lower maintenance and fuel expense
 - Increased vehicle residual value
- Micro and demographic trends
 - Ease of operation increases pool of qualified drivers
 - Less driver training, lower turnover and improved safety
- Underserved North America market segments

Source: Allison.

- (2) Includes medium- and heavy-duty commercial vehicles.
- (3) 2017 Outside-North America On-Highway Transmission Net Sales by Region: EMEA \$179M, Asia Pacific \$141M and South America \$24M.

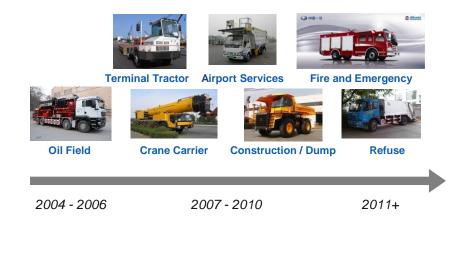

⁽¹⁾ Includes Class 4-7 trucks, Class 8 straight trucks, buses (school, conventional transit, shuttle and coach) and motorhomes.

Accelerate Adoption in Emerging Markets – China

- Allison is the #1 supplier of fully-automatic transmissions in China as a result of targeting specific vocations
 - Substantial installed base of approximately 70,000 transmissions in China
- Several million commercial vehicles produced annually of which approximately 250,000 are addressable by Allison
 - Allison's existing bus presence serves as entry point for incremental penetration into a market in which Fully-Automatic penetration is less than 5%
- Significant growth opportunities by targeting a wide range of vocational truck applications
 - Government emphasis on equipment modernization for mining, rescue operations, school buses and other applications
 - Construction and energy sectors
- OEM release activities supported by focused end user initiatives resulting in fleets requesting Allison by name

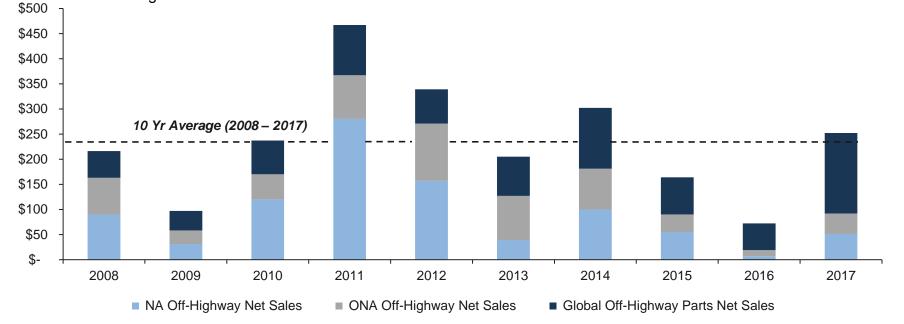

Global Off-Highway Growth Opportunities

- Energy Sectors
 - Considerable end market cyclicality, recovering from trough levels
 - Multiple opportunities in exploration, fracturing and oil & gas support
 - Introduction of new high horsepower hydraulic fracturing transmissions

- Mining and Construction
 - Considerable end market cyclicality, currently at trough levels
 - North America, Europe,
 Middle East, Africa and China
 - Increasing urbanization in emerging markets driving increased construction activity and raw material demand

- High Horsepower Hydraulic Fracturing Transmissions
 - New Oil Field Series (OFS) models based on six decades of industry expertise
 - Addresses global market demand for higher horsepower, extended duty cycles, lower days-to-depth and higher recovery factors

Leading Technology and Innovation

FuelSense[®] 2.0

- Proprietary software launched in 2017, ideally suited for shift dense vocations such as transit, school bus, refuse, construction and distribution
- DynaActive Shifting utilizes learning algorithm to continuously find the ideal balance of fuel economy and performance
- Neutral at Stop trims fuel consumption and emissions by reducing load on the engine when the vehicle is stopped
- Acceleration Rate Management limits vehicle acceleration to a customized calibrated rate

xFE Models

optimized gear ratios and coupled with FuelSense Max™

Represents the latest in fuel savings innovation

models with FuelSense features

New transmissions with redesigned torque converter damper,

Fuel savings of up to 7% over comparatively equipped

Best fuel economy from an automatic transmission

Available in the 1000, 2000 and 3000 Series fully-automatic

Nine Speed Transmission

- New design targeted for global release in 2020, leverages the proven reliability of the Allison six-speed 2000 Series[™]
- New benchmark in fuel efficiency and reduced emissions standards
- Significant fuel savings due to deep first gear ratio, industry leading ratio coverage and advanced engine stop-start capability
- Improved driver comfort and acceleration, allowing for a smoother launch and increased productivity

TC10[®]

- Ten-speed fully-automatic transmission targeted at Class 8 tractors primarily serving urban markets
 - Addressable annual market size of approximately 60k units
 - Historically a "manual" market underserved by Allison's fully-automatic product portfolio
- Optimizes acceleration and eliminates power interrupt that occurs in manual and automated manual shifting

Average Annual Spend over \$110 Million in Product-Related Research and Development Since 2007

FuelSense is a registered trademark of Allison Transmission Inc.

Diverse Propulsion Solutions

- Allison's addressable market is a complex application space due to vocational fragmentation, requiring a range of propulsion solutions where Allison is a natural supplier
 - Internal Combustion Engines
 - Alternative Fuels with proven performance and a funded infrastructure
 - Electric Hybrid Systems
 - Plug-in Options
 - Full Electric Solutions
- The combination of our Electrification Experience and Expertise, Vocational Knowledge, and Product Planning discipline uniquely positions Allison to have:
 - the right products
 - for the right customers
 - at the right time

Allison Electric Hybrid 40/50 EP[™] Extended Range

- Launched in 2003, Allison's electric hybrid propulsion system for transit buses has proven to be among the most dependable and efficient electric hybrid systems at work anywhere in the world
- Latest generation includes a pure electric extended range for up to 15 kilometers, featuring zeroemissions with engine off, including approaching, during and departing passenger stops for a quieter and healthier environment
- Engineered for regenerative braking, converting a vehicle's kinetic energy into stored electric power to propel the vehicle or to provide additional pure electric capabilities for auxiliary operations
- Allison is the lead electrification and system integrator, controlling the entire powertrain including the engine
- To date, Allison has sold more electric hybrid systems for commercial vehicles than any other company in the world
 - Approximately 8,000 Allison Hybrids delivered worldwide
 - In 230 cities worldwide
 - In 43 of 50 states in the United States
 - 41,078,950 gallons (155,500,741 liters) of fuel saved
 - 406,465 metric tons of CO₂ prevented
- Released with all North American Transit OEMs
 - Purpose built architecture and design
 - Superior gradeability
 - Real world fuel economy gains and reduced emissions

Electrification Initiatives

- Expanded partnership with Leonardo DRS to develop On-Board Vehicle Power (OBVP) systems for military vehicles
 - Intended for a heavier class of military vehicle, such as the 44-ton Oshkosh Heavy Expanded Mobility Tactical Truck (HEMTT), equipped with Terminal High Altitude Area Defense (THAAD) anti-ballistic missile launchers
 - Latest collaboration involves a fully integrated generator within the housing of an Allison 4500 Specialty Series[™] transmission, installed into the driveline in its original configuration, without affecting vehicle functionality
 - Capability to produce up to 120 kW of electrical power for use on or off-board the vehicle
- EMOSS Mobile Systems' Electric Vehicle with Extender Range (E.V.E.R.) semi-truck, equipped with an Allison 4500 fully automatic transmission to provide customers with reduced emissions solutions
 - Based on a DAF chassis, the E.V.E.R. semi-truck is rated for a gross combination weight of up to 50 metric tons and has a range exceeding 300 miles, currently in testing with pilot customers
 - The Allison transmission provides torque multiplication to reduce demand on the electric motor and the battery pack, reducing energy consumption and facilitating the use of less-expensive, lighter and smaller components
 - Calibrated to use six forward gears when fully-laden, the transmission is critical for hauling heavier payloads and navigating challenging topographies, in countries such as Switzerland and Austria
- Terberg fully electric terminal tractor equipped with an Allison 3000 Series transmission
 - 100% electric truck uses an Allison fully automatic transmission to launch with a gross combination weight of up to 65 tons
 - Further utilizes the power take-off provision to drive the hydraulic pump, which saves an additional electric generator
 - Operating throughout Europe since 2015
- Equity stake in Odyne, a leading manufacturer of electric hybrid systems for medium and heavy-duty work trucks
 - Cooperation agreement to develop an exportable power system that can be utilized with Allison's 1000, 2000, 3000, and 4000 Series transmissions
- Multiple on-going OEM programs examining a variety of electrification concepts

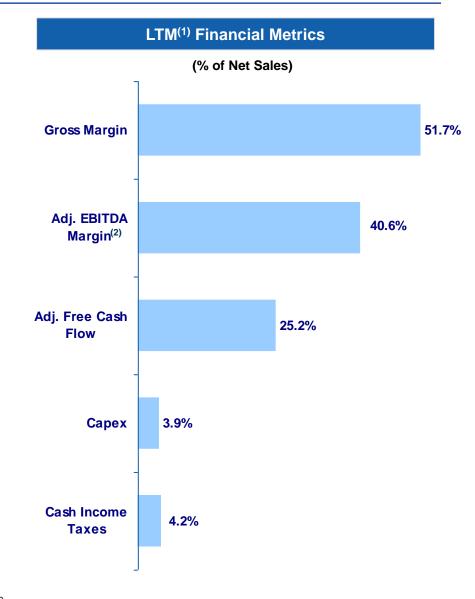

Financial Overview

Allison Financial Highlights

- Solid operating margins
 - End markets diversity
 - Premium vocational pricing model
 - Cost controls and productivity improvements
 - Multi-Tier UAW wage and benefits structure
- Low recurring capital expenditure requirements
- Valuable U.S. income tax shield
 - \$0.3bn present value
- Positioned for long-term cash earnings growth
 - Multiple growth opportunities in asset light business model
- Strong free cash flow

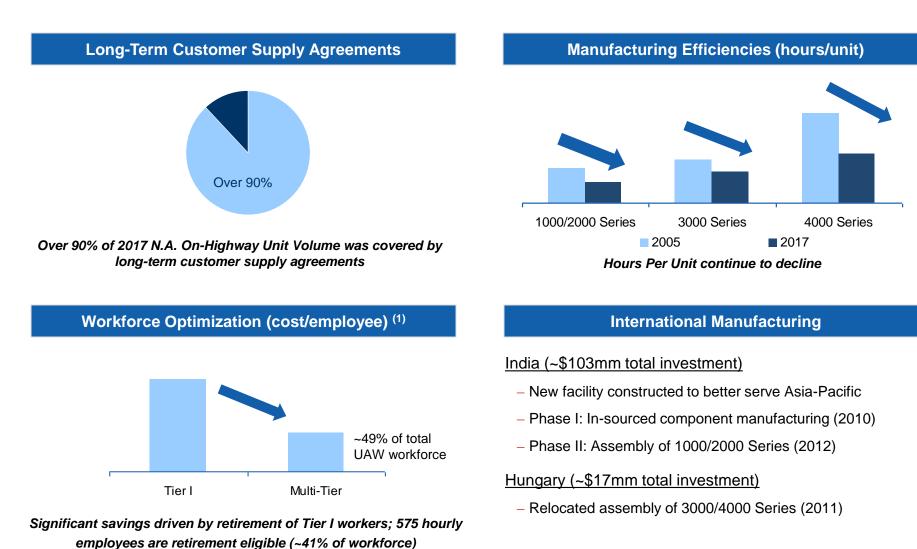

(1) LTM 9/30/18.

(2) Adjusted EBITDA margin: Adjusted EBITDA divided by net sales.

Note: See appendix for comments regarding the presentation of non-GAAP financial information.

Income Tax Attributes

Income Tax Attributes Overview

- Allison acquired from General Motors in August 2007
 - Asset deal structure
 - Step-up in basis for U.S. federal income tax purposes

Cash Ir	ncome Ta	axes Pai	d 2008-2	2017 (\$ n	nillions)				
2008	2009	<u>2010</u>	<u>2011</u>	<u>2012</u>	<u>2013</u>	<u>2014</u>	<u>2015</u>	<u>2016</u>	<u>2017</u>
\$4	\$6	\$2	\$6	\$11	\$4	\$5	\$5	\$13	\$96

- As of 12/31/2017 Allison had \$1.4bn of unamortized intangible assets
 - Expect annual U.S. federal income tax deductions of \$315mm through 2021 and \$183mm in 2022

(\$ millions)	Total	2018	2019	2020	2021	2022
Annual tax amortization	\$1,443	\$315	\$315	\$315	\$315	\$183
Cash tax savings ⁽¹⁾	320	70	70	70	70	40

Results in present value tax savings of \$259-\$286mm⁽²⁾

(1) Assuming continued profitability and no limitations at an assumed 22% federal and state tax rate.

(2) Based on annual discount rate of 5-10%; includes amortization of intangibles.

Summary

- Allison Transmission is the global leader in the markets it serves
 - Premier fully-automatic transmission brand
 - Over 100 year operating history
- Strong financial position
 - Industry leading EBITDA margin
 - Asset light business model
 - Significant free cash flow generation
 - Returning capital to shareholders
- Substantial long-term growth opportunities
 - Expand global leadership
 - Penetrate emerging markets
 - Address underserved markets
 - Continuous product innovation

Guidance / Supplemental Financial Data

2018 Guidance Update

	Guidance	Commentary
Net Sales Change from 2017	18.0 to 19.0 percent	Guidance reflects increased demand in the Global On- Highway and Global Off-Highway products, price increases on certain products and continued execution of our growth initiatives
Net Income (\$ in millions)	\$600 to \$620	
Adjusted EBITDA (\$ in millions)	\$1,090 to \$1,110	
Net Cash provided by Operating Activities (\$ in millions)	\$785 to \$805	
CapEx (\$ in millions)	\$90 to \$100	Subject to timely completion of development and sourcing milestones
Adjusted Free Cash Flow (\$ in millions)	\$685 to \$715	Net Cash Provided by Operating Activities less CapEx
Cash Income Taxes (\$ in millions)	\$100 to \$110	

Historical Financial Summary

Financial Summary													
In \$ millions Annual													
	2008	2009	2010	2011	2012	2013	2014	2015	2016	2017

Appendix: Non-GAAP Financial Information

Non-GAAP Financial Information

We use Adjusted EBITDA and Adjusted EBITDA as a percent of net sales to measure our operating profitability. We believe that Adjusted EBITDA and Adjusted EBITDA as a percent of net sales provide management, investors and creditors with useful measures of the operational results of our business and increase the period-to-period comparability of our operating profitability and comparability with other companies. Adjusted EBITDA as a percent of net sales is also used in the calculation of management's incentive compensation program. The most directly comparable U.S. generally accepted accounting principles ("GAAP") measure to Adjusted EBITDA is Net income. Adjusted EBITDA is calculated as the earnings before interest expense, income tax expense, amortization of intangible assets, depreciation of property, plant and equipment and other adjustments as defined by Allison Transmission, Inc.'s, the Company's wholly-owned subsidiary, Senior Secured Credit Facility.

We use Adjusted Free Cash Flow to evaluate the amount of cash generated by our business that, after the capital investment needed to maintain and grow our business and certain mandatory debt service requirements, can be used for repayment of debt, stockholder distributions and strategic opportunities. We believe that Adjusted Free Cash Flow enhances the understanding of the cash flows of our business for management, investors and creditors. Adjusted Free Cash Flow is also used in the calculation of management's incentive compensation program. The most directly comparable GAAP measure to Adjusted Free Cash Flow is Net cash provided by operating activities. Adjusted Free Cash Flow is calculated as Net cash provided by operating activities after additions of long-lived assets and certain other adjustments.

Non-GAAP Reconciliations (1 of 3)
